Pranav Goyanka

Boston, MA | 774-284-6311 | pgoyanka@gmail.com | linkedin.com/in/pranavgoyanka | github.com/pranavgoyanka

Skills

Programming Languages: Go, TypeScript, JavaScript, C++, Python, Java, SQL, HTML/CSS
Frameworks: PyTorch, TensorFlow, Docker, Node.js, Socket.IO, WebSocket, OpenTelemetry
Tools and Libraries: Flink, Kafka, Redis, scikit-learn, AWS, RESTful API, Git, Linux

Experience

Teaching Assistant & Course Designer, Boston University – Boston, MA   Jan 2024 – Present
- Implemented the OmniPaxos consensus protocol and wrote extensive unit tests in Go.
- Designed assignments, grading infrastructure, and coursework for writing formal specifications using TLA+.
- Assisted Prof. John Liagouris in conducting weekly lab sessions and office hours.

Software Development Engineer, Mobile Premier League – Bangalore, India   Oct 2022 – Jul 2023
- Engineered backend systems and centralized libraries for Node.js microservice based server-authoritative games.
- Optimized infrastructure utilization and monitoring via centralized libraries and OpenTelemetry integration, resulting in a 40% reduction in infrastructure costs.
- Expanded matchmaking systems with cross country support, boosting user engagement and retention by 70%.

Software Development Engineer, Amadeus Software Labs – Bangalore, India   Aug 2021 – Oct 2022
- Built a Splunk Dashboard for Functional Monitoring and FMEA, cutting manual tasks by 50%.
- Rectified malfunctioning SQL database purge scripts, reducing disk space usage over 90%.
- Resolved daily incidents promptly in the C++ based Back Office Tool, resulting in a 40% incident reduction.

Software Engineering Intern, Amadeus Software Labs – Bangalore, India   Jan 2021 – May 2021
- Created 'Chatbot as a Service', a modular framework to reduce chatbot development effort by more than 50%.
- Developed and released standalone Java libraries for Google Dialogflow, IBM Watson's NLP APIs, and MongoDB.

Student Developer, Google Summer of Code – Remote   Jun 2020 – Aug 2020
- Contributed to the project 'Social Street Smart' for combating fake information on the internet.
- Created and deployed serverless Machine Learning models, CI/CD pipelines and APIs for fake news detection.
- Migrated TensorFlow Machine Learning models to lightweight TFLite models & deployed them to AWS Lambda.
- Developed a JavaScript API to detect misinformation in images using the Google Images API.

Projects

Retrieval-Augmented Generation for Internal Documentation   Jul 2024 – Aug 2024
- Developed a RAG pipeline that optimizes LLM responses based on proprietary documentation.
- Implemented a user-friendly web UI using Flask for uploading documentation and interacting with the model.
- Evaluated the correctness and accuracy of responses with RAG enabled and disabled across multiple LLMs.

Fault Tolerant Key-Value Store   Oct 2023 – Nov 2023
- Implemented the Raft distributed consensus algorithm using Go, and built a key-value storage service using it.
- Ensured robustness against various network and node failures by using an extensive suite of unit tests.

Education

Boston University   Sep 2023 – Dec 2024
MS in Computer Science | GPA: 3.78/4.00
Courses: Principles of Machine Learning, Distributed Systems, Tools for Data Science

Thapar Institute of Engineering and Technology   Jul 2017 – Jun 2021
BE in Electronics and Communication Engineering | GPA: 8.84/10.00
Courses: Data Structures and Algorithms, Operating Systems
